

Internet Information Retrieval Services

'Knowledge is of two kinds. We know a subject ourselves, or we know where we can find information upon it.'

(Samuel Johnson, 1709-1784)

Primary sources of information allow the learner to access original and unedited information.

A primary source requires the learner to interact with the source and extract information.

Secondary sources are edited primary sources, second-hand versions. They represent someone else's thinking.

Customized Contents on CD ROM for your specific information needs !
